

Water Intelligence Solutions: Cooling Towers

Cooling towers use vast amounts of water during normal operation. A hidden mechanical fault that's simple to fix could cost hundreds of thousands of dollars a year in wasted water.

The WINT Advantage

WINT delivers dedicated solutions to detect water waste in cooling towers that:

- Save hundreds of thousands of dollars per year by detecting cooling tower failures
- Monitor water use at the cooling tower
- Alert you when the tower unnecessarily wastes water
- Fully integrate with building management systems

Help you meet your sustainability targets
