Water Intelligence Solutions:
Restaurants and Quick-Service

WINT is a leader in water management technology, designed to transform how restaurants and QSRS businesses manage water systems. Our technology provide real-time monitoring and automated management capabilities, ensuring every location is protected from the risks of water damage and excessive consumption.

The WINT Advantage

In an industry where efficiency is paramount, water-related challenges such as business interruptions, inconsistent usage across locations, and unforeseen maintenance have become major operational concerns, often resulting in significant financial impacts.

With WINT, tackle these head-on through:

• **Advanced Monitoring:** Continuous surveillance of water systems to detect anomalies before they escalate.

• **Automated Controls:** Smart solution that automatically shut off water flow in response to detected issues, preventing excessive water usage, leaks and damage.

• **Data-Driven Management:** Utilize data from across all sites to optimize water use, reduce waste, and lower costs.
